20-1. 글 답변 페이지 만들기

```java
@RequestMapping("/reply_view")
public String reply_view(HttpServletRequest request, Model model){
    System.out.println("reply_view()");

    model.addAttribute("request", request);
    command = new BReplyViewCommand();
    command.execute(model);

    return "reply_view";
}

@RequestMapping("/reply")
public String reply(HttpServletRequest request, Model model) {
    System.out.println("reply()");

    model.addAttribute("request", request);
    command = new BReplyCommand();
    command.execute(model);

    return "redirect:list";
}
```

Bcontroller.class

```java
@Override
public void execute(Model model) {
    // TODO Auto-generated method stub

    Map<String, Object> map = model.asMap();
    HttpServletRequest request = (HttpServletRequest) map.get("request");

    String bId = request.getParameter("bId");
    String bName = request.getParameter("bName");
    String bTitle = request.getParameter("bTitle");
    String bContent = request.getParameter("bContent");
    String bGroup = request.getParameter("bGroup");
    String bStep = request.getParameter("bStep");
    String bIndent = request.getParameter("bIndent");

    BDao dao = new BDao();
    dao.reply(bId, bName, bTitle, bContent, bGroup, bStep, bIndent);

}
```
